evolution™

LITTER BIN

The **new** contemporary styled litter bin with narrow footprint to complement all locations.

Durable Construction

Evolution bin is manufactured in Durapol® vandal resistant, self coloured material. Durapol is weather resistant and will not chip or corrode with no need for painting.

Environmentally Friendly

All four standard colours are recyclable after the litter bin's usable life. The Black Evolution bin is also produced using 100% recycled material.

Integrally Moulded Knuckle Hinge

The strong and durable hinge is integrally moulded into the body and door. The hinge includes a weather resistant stainless steel reinforcing bar.

Anti-Fly Poster Features

The integrally moulded bosses, side recesses and textured finish increase vandal resistance. These anti-fly poster details can help to discourage posters being adhered to the bin's surface.

Narrow Footprint

The elliptical shape gives the Evolution bin a narrow footprint, allowing installation in areas where space is limited, without obstructing pedestrian flow.

Elliptical Design with Curved Hood

The vandal resistant shape produces a strong, robust, rigid litter bin. Evolution bin is designed with smooth clean lines and rounded corners minimising the adhesion of dirt and moisture collection.

Personalisation

The two central areas on the bin can be used for personalisation, either on the front door panel or on the same area at the rear of the bin. See the back page of this leaflet for more details.

Key Opening/ Slam Lock

The key opening/slam lock is quick and secure to use as no key is required to lock the bin. The key operated door-opening is tamper resistant yet offers easy access to the 65 litre zinc coated steel liner.

Double Skinned Door

The vandal resistant door moulding is very strong and robust. The large door-opening design allows easy access for ground fixing.

Optional Extras **FIREXPRESS** Fire Safety Device is also available, see the back page.

Stainless Steel Stubber Plate

The plate provides a target area on top of the bin to extinguish a cigarette, helping to protect the bin surface. The polished stainless steel stubber plate is weather-resistant and tamper-proof, with no visible external fixings.

Stainless Steel Hood-Mounted Ashtray

This new design ashtray safely collects cigarette waste as well as reducing the risk of fire within the litter bin liner. It is manufactured from Marine Grade 316 polished stainless steel, to minimise the risk of corrosion.

Waste Aperture Flap Kit

An optional waste aperture flap kit is available. The aperture flaps are ideal for locations where seagull/bird nuisance or wind blown litter could cause a problem.

evolution™ LITTER BIN

This stylish litter bin complements any contemporary location including residential areas, town centres, pedestrianised areas, shopping centres, bus stops, transport terminals, plus leisure and recreation areas.

Quick & Easy To Empty

1. Insert the key into the lock and unlock clockwise.

2. Open the door. The large opening allows easy access and minimal lifting.

3. Remove the liner for emptying then replace the liner.

4. Simply slam the door to lock.

Specifications

Dimensions

Height 1025mm
 Width 650mm
 Depth 400mm
 Aperture Width 386mm
 Aperture Height 166mm

Weights

Weight of bin without liner 12.5kg
 Weight of bin with steel liner 17.36kg
 Weight of liner 4.86kg
 Capacity of liner 65 Litres

Colours

Millstone Dark Grey Dark Blue Black
 (100% recycled material)

Alternative colours are available subject to a minimum order quantity.
 Bin-it symbols are available in Gold, Silver or White.

Materials

Body and Door Durapol*
 Hinge Rod Stainless Steel
 Slam Lock Zinc Coated Steel
 Steel Liner Zinc Coated Steel
 Waste Aperture Flaps.. Durapol

* Durapol material is a polymer formulated to withstand extremes of temperature and is impact-tested in our Quality Assurance Laboratory as part of our BS EN ISO 9001:2000 test procedure.

Fixing Options

Concrete Foundation Fixing Bolts
 Paving Fixing Bolts
 Adjustable Depth Concrete In Anchors
 External Concrete Ballast
 Ground-Lock™ System (installation tool required) *One Ground-Lock fixing tool supplied free with every 3 x kits ordered.*

(Due to the narrow footprint of the bin we would strongly recommend that the bin is always sited using one of the fixing methods listed above.)

FIREXPIRE®

Fire Safety Device

FIREXPIRE is available with the Evolution bin. The unique Glasdon fire safety device, provides an invaluable safety measure around premises to reduce the risk of fire. Firexpire has proven successful in extinguishing a fire in less than 30 seconds under test conditions.

Please note that Firexpire cannot be used in conjunction with the aperture flaps or the hood-mounted ashtray.

STAGE 1
A burning match is carelessly discarded into a litter bin.

STAGE 2
The fire takes hold.

STAGE 3
In under a minute, the fire extinguishing plate drops onto the liner.

STAGE 4
The fire is contained.

An optional extra on Glasdon hooded litter bins, FIREXPIRE device is a fire extinguishing plate fitted within the bin top. Should a fire break out inside the bin, a special replaceable, heat responsive device releases the plate which then seals off the mouth of the liner and snuffs out the fire through oxygen starvation. Replacement of the heat responsive device using only a screwdriver resets FIREXPIRE device on site.

(Firexpire is an effective low cost auxiliary device and must never replace primary fire prevention measures. Obstructions preventing the plate from dropping may adversely affect the function of the unit and as many Firexpire devices are used in unsupervised locations, regular inspection and immediate replacement of any damaged or distorted components is essential.)

How To Order

To order direct from this Leaflet, simply write to us at the address shown or alternatively telephone 01253 600410, fax 01253 792558, or e-mail: sales@glasdon-uk.co.uk

Free Delivery In Mainland UK & Northern Ireland

Our national distribution network ensures prompt delivery in mainland UK and Northern Ireland. All our prices are carriage-free on the mainland and Northern Ireland for orders over £50 value, only VAT will be added. However, to help offset the cost of packing, administration and delivery, there is a small charge of £5 on orders below the value of £50.

Personalisation

Evolution bin has two areas which can be personalised with your organisation's name, logo or message. These are on the front of the bin just below the aperture on the door and in the same position on the rear of the bin. The area for personalisation is approximately A5 size in either portrait or landscape orientation. Personalisation is also available to fit the recessed area of the bin on request.

To see how attractive your organisation's logo/crest would look on Evolution bin, we can provide you with a computer illustration totally free of charge.

Please telephone 01253 600410 to discuss your requirements.
