

Attractive and Functional Litter Bins For

North
Lanarkshire
Council

Problem Identified

North Lanarkshire Council wanted to update their provision of litter containers in Drumpellier Country Park, Coatbridge. They were looking for a product that would enhance the natural surroundings and co-ordinate with other features already in place, such as benches and fencing. There were also problems with the existing open-topped litter bins as wildlife in the park, including swans and seagulls, were able to get inside the bins and remove rubbish. This created litter problems throughout the park, making the area look untidy.

Solution

North Lanarkshire Council required a litter container that would blend in with the picturesque countryside location whilst deterring wildlife from removing litter. Following a product demonstration with a specially trained Glasdon Representative, the Glasdon **Enviropol 100™** litter bin was selected for use at the Lochside and Visitor Centre in Drumpellier Country Park.

This litter bin, chosen with brown slats, has the natural appearance of wood but without any of the maintenance problems. Ideal for exposed external environments, the **Enviropol 100** bin is manufactured from Enviropol® material and Durapol® material, which will not rot and never needs painting.

The environmentally friendly **Enviropol 100** bin is manufactured from 100% recycled and recyclable plastic materials. The litter bin is also easy to empty with a large front door which allows easy access with minimal lifting. The hooded design helps prevent rubbish being removed by wildlife.

Resulting Benefits

The **Enviropol 100** bin has proved to be an effective litter solution which co-ordinates with the surroundings whilst restricting wildlife access to the litter, keeping the area clean and tidy. Additional benefits include:

Enhances the surrounding area: The natural looking wood appearance fits in with the aesthetics of the park and complements the scenic location.

Reduced maintenance: The weather-resistant **Enviropol 100** litter bin is easy to clean, will not rot and never needs painting.

Ease of use: The large front door enables easy access and emptying with minimum lifting.

What the Customer Says

Tom Gallagher, Assistant Country Parks Manager at North Lanarkshire Council said:

“The Glasdon Enviropol 100 bin has provided an attractive addition to Drumpellier Country Park which has helped to solve the litter problems caused by wildlife. We are very happy with this product and the excellent service we have received from Glasdon.”

We are grateful to North Lanarkshire Council for the kind help given in the production of this case study
